Ahmed, I. S. and Lockett, M. J., Tray and point efficiencies from a 0.6 metre diameter distillation column	110
Ajawin, L. A., Perez de Ortiz, E. S. and Sawistowski, H., Extraction of zinc by di(2-ethylhexyl) phosphoric acid	62
Amselem, C. and Ollero, P., Decomposition algorithm for chemical process stimulation	303
Ashcroft, S. J., Shearn, R. B. and Williams, G. J. J., Visual equilibrium cell for multiphase systems at pressures up to 690 bar	51
Atkinson, B., Webb, C. and Black, G. M., Liquid fluidisation of highly porous particles	125
Bailes, P. J., Godfrey, J. C. and Slater, M. J., Liquid-liquid extraction test systems	321
Barker, P. E., England, K. and Vlachogiannis, G., Mathematical model for the fractionation of dextran on a semi-continuous counter-current simulated moving bed chromatograph	241
Berger, F. P. and Ziai, A., Optimisation of experimental conditions for electrochemical mass transfer measurements	377
Black, G. M., Webb, C. and Atkinson, B., Liquid fluidisation of highly porous particles	125
Blakebrough, N., McManamey, W. J. and Walker, G., Heat transfer to fermentation systems in an air-lift fermenter. Part II: Osmotic effects on heat transfer	264
Blakebrough, N., Fatile, I. A., McManamey, W. J. and Walker, G., Heat transfer to fermentation systems in an air-lift fermenter. Part III: Mechanisms of heat transfer	383
Bourne, J. R. and Rohani, S., Micromixing and the selective iodination of l-tyrosine	297
Bridges, W. G., Willis, M. S. and Collins, R. M., Complete analysis of non-parabolic filtration behaviour	96
Bruxelmann, M., Desplanches, H., Chevalier, J. L. and Ducla, J., Characteristic variable, prediction and scale-up for heat transfer to coils in agitated vessels. Part I: Newtonian fluids in the turbulent region	3
Burfoot, D. and Rice, P., Heat transfer and pressure drop characteristics of short lengths of swirl flow inducers interspaced along a circular duct	253
Chapman, C. M., Nienow, A., Cooke, M. and Middleton, J. C., Particle-gas-liquid mixing in stirred vessels	
Part I: Particle-liquid mixing	71
Part II: Gas-liquid mixing	82
Part III: Three phase mixing	167
Part IV: Mass transfer and final conclusions	182
Chen, J. J. J., Leung, Y. C. and Spedding, P. L., Simple method of measuring voidage in a bubble column	325
Chevalier, J. L., Desplanches, H., Bruxelmann, M. and Ducla, J., Characteristic variable, prediction and scale-up for heat transfer to coils in agitated vessels. Part I: Newtonian fluids in the turbulent region	3
Chhabra, R. P., Farooqi, S. I., Richardson, J. F. and Wardle, A. P., Co-current flow of air and shear thinning suspensions in pipes of large diameter	56
Chhabra, R. P. and Richardson, J. F., Hydraulic transport of coarse gravel particles in a smooth horizontal pipe	313
Collins, R. M., Willis, M. S. and Bridges, W. G., Complete analysis of non-parabolic filtration behaviour	96
Colman, D. A. and Thew, M. T., Correlation of separation results from light dispersion hydrocyclones	233
Cooke, M., Chapman, C. M., Nienow, A. W. and Middleton, J. C., Particle-gas-liquid mixing in stirred vessels.	
Part I: Particle-liquid mixing	71
Part II: Gas-liquid mixing	82
Part III: Three phase mixing	167
Part IV: Mass transfer and final conclusions	182
Davidson, J. F. and Martin, P. D. Flow of powder through an orifice from a fluidised bed	162
Desplanches, H., Bruxelmann, M., Chevalier, J. L. and Ducla, J., Characteristic variable, prediction and scale-up for heat transfer to coils in agitated vessels	329
Dhulesia, H., Operating flow regimes on the valve tray	3
Ducla, J., Desplanches, H., Bruxelmann, M. and Chevalier, J. L., Characteristic variable, prediction and scale-up for heat transfer to coils in agitated vessels	3
El-Dahshan, M. E., The role of carbides in the accelerated attack of cobalt-base alloys	13
England, K., Barker, P. E. and Vlachogiannis, G., Mathematical model for the fractionation of dextran on a semi-continuous counter-current simulated moving bed chromatograph	241
Fahmi, M. F. and Mostafa, H. A., Distillation with optimum vapour compression	391
Farooqi, S. I., Chhabra, R. P., Richardson, J. F. and Wardle, A. P., Co-current flow of air and shear thinning suspensions in pipes of large diameter	56
Fatile, I. A., Blakebrough, N., McManamey, W. J. and Walker, G., Heat transfer to fermentation systems in an air-lift fermenter. Part III: Mechanisms of heat transfer	383
Fei, W.-Y., Rod, V. and Hanson, C., Evaluation of mass transfer and backmixing parameters in extraction columns from measured solute concentrations	290
Gaunt, G. N., Effect of high particle concentration on the boundary layer flow in a hydrocyclone	271
Geldart, D. and Haesebrouck, M., Studies on the intermittent discharge of coarse solids from fluidised beds	224
Glass, D. H. and Mojtabaei, W., Measurement of fluidised-bed bubbling properties using a fibre-optic light probe	37
Godfrey, J. C., Bailes, P. J. and Slater, M. J., Liquid-liquid extraction test systems	321
Haesebrouck, M. and Geldart, D., Studies on the intermittent discharge of coarse solids from fluidised beds	224
Hanson, C., Rod, V. and Fei, W.-Y., Evaluation of mass transfer and backmixing parameters in extraction columns from measured solute concentrations	290
Hartland, S. and Kumar, A., Correlations for dispersed phase holdup in pulsed sieve plate liquid-liquid extraction columns	248
Heggs, P. J., Tenth Annual Research Meeting: Process Intensification	266
Hills, J. H., Investigation into the suitability of a transverse Pitot tube for two phase flow measurements	371
Holland, F. A., Siddig-Mohammed, B. E. and Watson, F. A., Study of the operating characteristics of a reversed absorption heat pump system	283

## INDEX

Decomposition algorithm for chemical process simulation. P. Oller and C. Amselem			
Distillation with optimum vapour compression. M. F. Fahmi and H. A. Mostafa			
Effect of high particle concentration on the boundary layer flow in a hydrocyclone. G. N. Gaunt			
Effect of non-uniform bubbles in the froth on the correlation and predictions of point efficiencies. M. J. Lockett and T. Plaka			
Evaluation of mass transfer and backmixing parameters in extraction columns from measured solute concentrations. V. Rod, W.-Y. Fei and C. Hanson			
Experimental study of the operating characteristics of a water-lithium bromide absorption cooler. J. M. Landrau-Paredes, F. A. Watson and F. A. Holland			
Extraction of zinc by di(2-ethylhexyl)phosphoric acid. L. A. Ajawin, E. S. Perez de Ortiz and H. Sawistowski			
Flow of powder through an orifice from a fluidised bed. P. D. Martin and J. F. Davidson			
Heat transfer and pressure drop characteristics of short lengths of swirl flow inducers interspaced along a circular duct. D. Burfoot and P. Rice			
Heat transfer to fermentation systems in an air-lift fermenter. Part II: Osmotic effects on heat transfer. N. Blakebrough, W. J. McManamy and G. Walker			
Part III: Mechanisms of heat transfer. N. Blakebrough, I. A. Fatile, W. J. McManamy and G. Walker			
Hydraulic transport of coarse gravel particles in a smooth horizontal pipe. R. P. Chhabra and J. F. Richardson			
Investigation into the suitability of a transverse Pitot tube for two phase flow measurements. J. H. Hills			
Limitations to the capacity of continuous thickeners. T. N. Smith			
Liquid fluidisation of highly porous particles. C. Webb, G. M. Black and B. Atkinson	45		
Liquid-liquid extraction test systems. P. J. Bailes, J. C. Godfrey and M. J. Slater	125		
Marangoni effect in distillation of alcohol-water mixtures. F. J. Zuiderweg	371		
Mathematical model for the fractionation of dextran on a semi-continuous counter-current simulated moving bed chromatograph. P. E. Barker, K. England and G. VLachogiannis	388		
Measurement of fluidised bed bubbling properties using a fibre-optic light probe. D. H. Glass and W. Mojtabaei	241		
Metastable zone of solutions. O. Sohnle	37		
Micromixing and the selective iodination of l-tyrosine. J. R. Bourne and S. Rohani	186		
Model for the effects of adsorbents and cleaners on ultrafiltration membrane structure. M. S. Le and J. A. Howell	297		
New concepts in thermodynamics for better chemical process design. Royal Society Esso Energy Award Lecture. B. Linnhoff	191		
Operating flow regimes on the valve tray. H. Dhulesia	207		
Optimisation of experimental conditions for electrochemical mass transfer measurements. F. P. Berger and A. Ziai	329		
Oxygen transfer in a production scale bioreactor. N. M. G. Oosterhuis and N. W. F. Kossen	377		
Particle-gas-liquid mixing in stirred vessels. C. M. Chapman, A. W. Nienow, M. Cooke and J. C. Middleton.	308		
Part I: Particle-liquid mixing	71		
Part II: Gas-liquid mixing	82		
Part III: Three phase mixing	167		
Part IV: Mass transfer and final conclusions	182		
Particulate and delayed bubbling regimes in fluidisation. P. D. Martin	318		
Recent developments in condensation theory. R. G. Owen and W. C. Lee	335		
Role of carbides in the accelerated attack of cobalt-base alloys. M. E. El-Dahshan	13		
Royal Society Esso Energy Award Lecture. New concepts in thermodynamics for better chemical process design. B. Linnhoff	207		
Sieve plate simulation study: contact angle and frequency of emission of bubbles from a submerged orifice with liquid crossflow. A. B. Ponter and T. Tsay	271		
Simple method of measuring voidage in a bubble column. J. J. J. Chen, Y. C. Leung and P. L. Spedding	119		
Solid-liquid fluidised beds: some design aspects. J. B. Joshi	290		
Solid-liquid mass transfer coefficients in bubble columns up to one metre diameter. V. K. Patil and M. M. Sharma	362		
Studies on the intermittent discharge of coarse solids from fluidised beds. D. Geldart and M. Haesebrouck	62		
Study of the operating characteristics of a reversed absorption heat pump system. B. E. Siddig-Mohammed, F. A. Watson and F. A. Holland	162		
Tenth Annual Research Meeting: Process Intensification. P. J. Heggs	226		
Tray and point efficiencies from a 0.6 metre diameter distillation column. M. J. Lockett and I. S. Ahmed	383		
Visual equilibrium cell for multiphase systems at pressures up to 690 bar. S. J. Ashcroft, R. B. Shearn and G. J. J. Williams	259
